Web Technologies: HTML/S(CSS), JavaScript, React

Database: MySQL

Developer Tools: Git/GitHub, VS Code

PROJECTS

India Eatzz [click here](#) | *React.js, HTML, Tailwind(CSS)*

- Developed a React web application aimed to search the recipes entered by user.
- I have used the TMDB Api to fetch the details of ingredients used in recipes.

Hospital Management System | *React.js, Express, Mysql, Node.js*

- A system which maintains day to day operations of hospitals, for example booking of appointments, managing doctor schedules, managing patient diagnoses, managing medical histories of patients
- The aim of this project is to show how data related to these tasks can be made easier to manage using databases.

Check Your Knowledge With Quizy [click here](#) | *HTML, CSS, Javascript*

- It is a Api based Quiz website which has questions from 3 different domains such as Anime, General Knowledge and Science.

Recipe Management System | *HTML, CSS, Javascript, React.js, MySQL*

- This web application is designed to store and manage different Recipes and user data. In our program several users can create and view different types of recipes including all the steps and ingredients.
- We also keep record of the details of the user who adds the recipes. Admin can edit or delete user and recipe details.

POSITION OF RESPONSIBILITY

Member at Prayaas: Let's Dream not die. A Non-profit organisation of IIIT Allahabad students for under privileged students.

Executive Corporate Relations: for technical fest of IIIT Allahabad.
